

The compliance management suite is designed to be used by all organizations in the field of aerospace management systems (e.g. aircraft operators, maintenance organizations, fixed-base operators, ground handling, training organizations, aerospace suppliers, authorities, drones operators and airports).

The AMAS suite of applications is the most comprehensive aerospace management system. It gives users easy access to complex regulatory and legal content, and simplifies compliance monitoring management processes to make them easier and more efficient.

The compliance management suite consists of various apps that bundle together the day-to-day tasks of a compliance management system.

The Compliance Management Suite includes the following apps:

- ✗ Identification of Obligations
- ✗ Questionnaires
- ✗ Reports
- ✗ Measure Management
- ✗ Audits and Inspections
- ✗ Information Collection

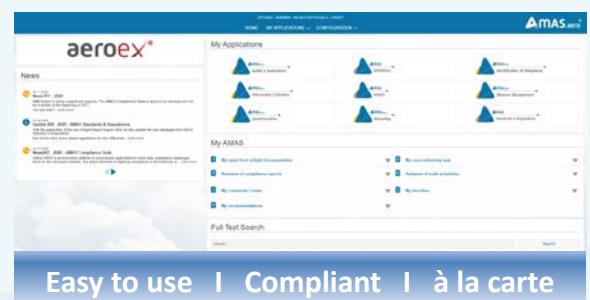

Core suite features

Various search and filter functions; dashboard with my notes, my favorites, news section and full text search; company logo branded portal (white label); responsive design (smartphones, tablets and PCs); online ticket system; additional AMAS applications to extend the basic features and many more.

Your advantages

- ✗ No large initial investment
- ✗ Short contract terms
- ✗ Annually terminable
- ✗ Digital know-how transfer
- ✗ Fast launch and availability
- ✗ Developed by subject matter experts
